

## 80.51 MODULAR TIMER, MULTI-FUNCTION

### 1 FRONT VIEW

- A Time scale rotary selector (Tmax)
- B Time setting (Tmin...Tmax)
- C LED
- D Function rotary selector

### 2 TERMINAL PUSH-IN CONNECTION

- 2a Connection with stranded wire (without screwdriver in case of solid wire)
- 2b Disconnection of the electrical connection

### 3 TIME SCALES

(Eg. T=10 min: set A=20 m and B=10)

### 4 WIRING DIAGRAM AND FUNCTIONS

**NOTE**  
Time scale and function must be set before energising the timer

#### 4a Without signal START functions:

Start via contact in supply line (A1)

- AI On-delay
- DI Interval
- SW Symmetrical flasher (starting pulse on)

#### 4b External START functions:

Start via contact into control terminal (B1)

- BE Off-delay with control signal
- CE On-and off-delay with control signal
- DE Interval with control signal on

4c Possible to control an external load, such as another relay coil or timer, connected to the signal start terminal B1

4d With DC supply, positive polarity has to be connected to B1 terminal (according to EN 60204-1)

4e A voltage other than the supply voltage can be applied to the command Start (B1), example:  
A1-A2 = 230 V AC  
B1-A2 = 24 V DC

### OTHER DATA

Minimum control impulse: 50 ms.  
Recovery time: 100 ms.  
35 mm rail mount (EN 60715).

### WORKING CONDITIONS

In conformity with the European Directive on EMC 2014/30/EC, the timer relay has a level of immunity, against radiated and conducted disturbances, considerably higher than requirements of EN 61812-1 standard. However, devices like transformers, motors, contactors, switches and power cables may cause disturbances and even damage the timer electronic circuit. For that reason, the wiring cables must be as short as possible, and, when necessary, the timer shall be protected by the relevant RC network, varistor or surge voltage protector.
